Sum of Life expectancy and Sum of GDP by Country and Status

Status ● Developed ● Developing ● Sum of GDP

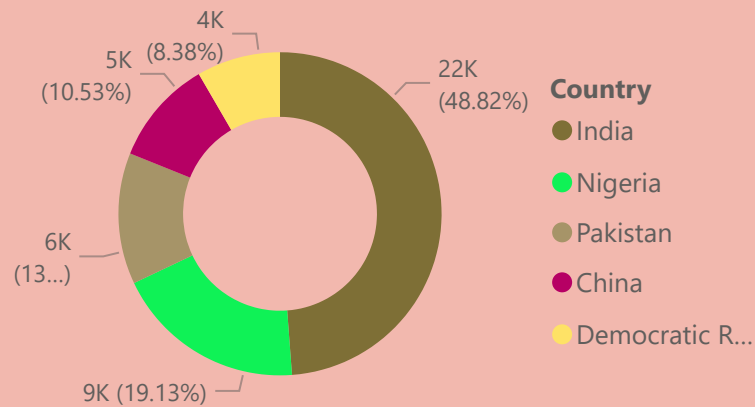

Sum of Total expenditure by Status

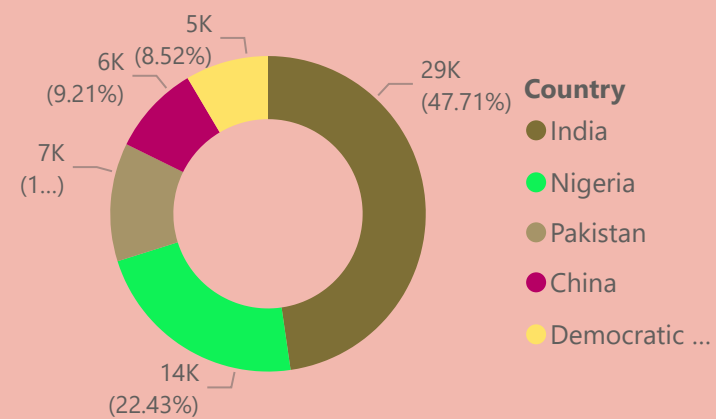

Sum of percentage expenditure for Developed (13,84,243.39) was higher than Developing (7,84,738.91).

Developed accounted for 63.82% of Sum of percentage expenditure.

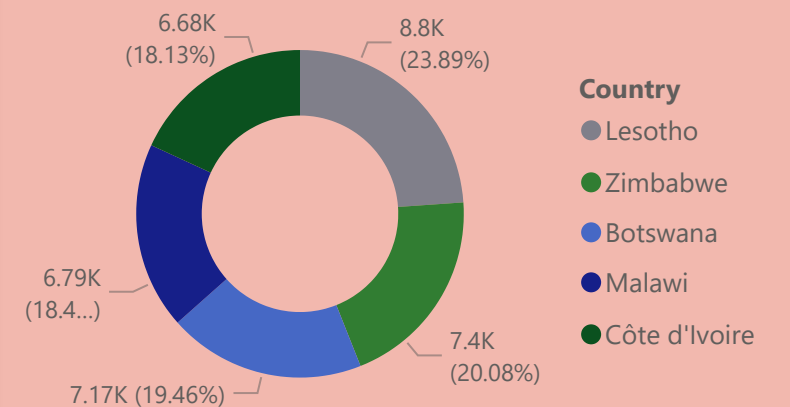

Sum of infant deaths by Country

Sum of under-five deaths by Country

Sum of Adult Mortality by Country

Insights

- . Total Sum of infant deaths was higher for Developing (88268) than Developed (765).
- . India in Status Developing made up 24.56% of Sum of infant deaths.
- . Average Sum of infant deaths was higher for Developing (548.25) than Developed (23.91).
- . Total Sum of Adult Mortality was higher for Developing (441725) than Developed (40799).
- . Lesotho in Status Developing made up 1.82% of Sum of Adult Mortality.
- . Average Sum of Adult Mortality was higher for Developing (2,743.63) than Developed (1,274.97).
- . Total Sum of Life expectancy was higher for Developing (1,62,141.30) than Developed (40,549.30).
- . Sum of Life expectancy and total Sum of GDP are negatively correlated with each other.
- . Japan in Status Developed made up 0.65% of Sum of Life expectancy .
- . Average Sum of Life expectancy was higher for Developed (1,267.17) than Developing (1,007.09).

Insights

- . Sum of Total expenditure for Developing (12,478.43) was higher than Developed (3,625.94).
- . Developing accounted for 77.48% of Sum of Total expenditure.
- . Sum of percentage expenditure for Developed (13,84,243.39) was higher than Developing (7,84,738.91).
- . Developed accounted for 63.82% of Sum of percentage expenditure.
- . India accounted for 48.82% of Sum of infant deaths.
- . India accounted for 47.71% of Sum of under-five deaths .
- . Lesotho accounted for 23.89% of Sum of Adult Mortality.
